

Integrating Disqus into your PodHawk site

Posted by Peter on 28 March 2009

[Disqus](#) is a comment management system for blogs. You can use it instead of the PodHawk comments system if you wish. It is now fully integrated into PodHawk - there are very simple instructions in the [PodHawk Wiki](#). And to prove it works, this site uses Disqus for all new postings, including this one, so you can see how Disqus works and feels.
